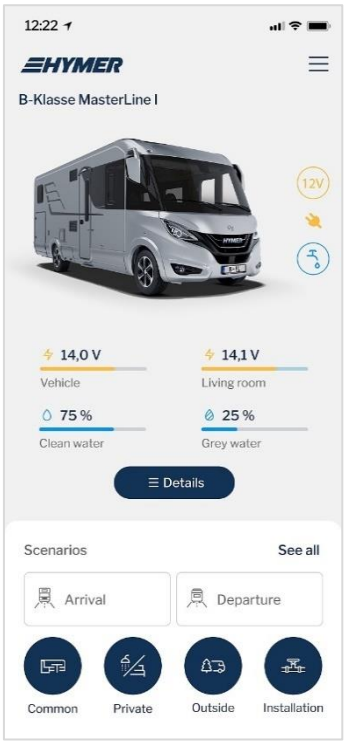
Hymer Connect App

An overview of the Hymer Connect App:

- First smart ecosystem for the connected mobile home consisting of hardware and software components developed by Hymer
- Vehicle information for the Mercedes-Benz Sprinter chassis cowl (location, mileage, service intervals) can be seen at a glance
- Many of the features in the living area (including lighting, heating, air conditioning, satellite system) can be controlled with ease using the app
- Standard information can also be easily viewed (e.g water tank filling level or battery status)
- App communicates via Bluetooth when close to the vehicle and via mobile communications from afar
- Service currently available in 30 European countries

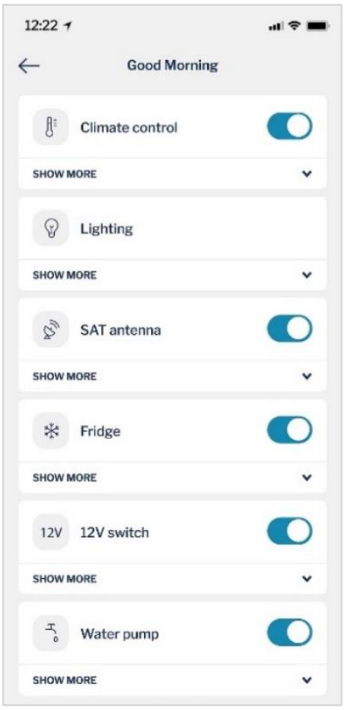


Availability & retrofitting:

- Available as standard in semi-integrated and integrated Hymer B-Class MasterLine models from the 2022 model year onwards
- Can also be retrofitted in selected B-ML models from the 2020 model year onwards (produced from September 2019 onwards) from April 2021 onwards (for a fee of 799.00 euros*)
- App available for iOS (version 12 and above) and Android (version 9 and above), free to download from April 2021 onwards via Google Play Store or Apple App Store
- Components certified by Hymer Original Parts can also be retrofitted with ease and integrated into the Hymer ecosystem

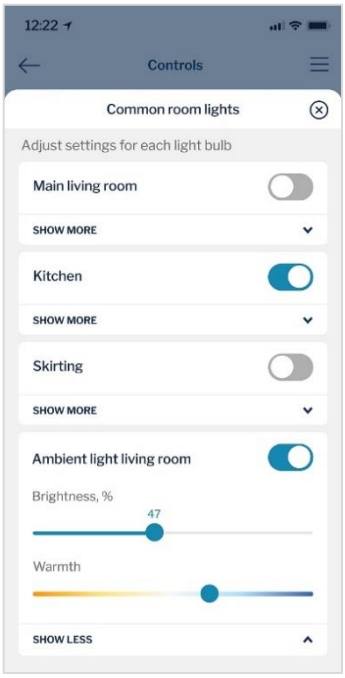
Convenient control thanks to pre-programmed scenarios:

- Pre-programmed scenarios for regularly recurring processes and procedures
- Good Morning scenario: room temperature of 22°C, hot water heater turned on, lights in the bedroom and living area switched on, satellite system extended
- Good Night scenario: room temperature of 18°C, hot water heater switched to eco mode, lights turned off, satellite system retracted
- Arrival scenario: heating, lights, refrigerator, water pump and satellite system automatically turned on
- Departure scenario: air conditioning, water pump, satellite system and lights automatically turned off
- All of the scenarios can be customised and you can add your own scenarios



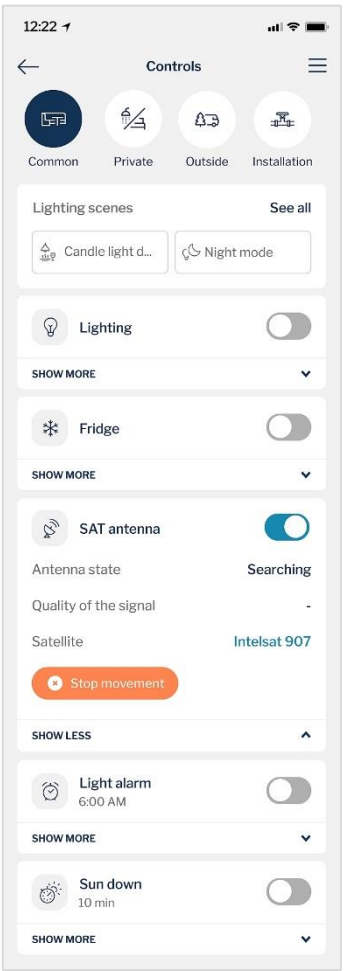
Smart lighting concept:

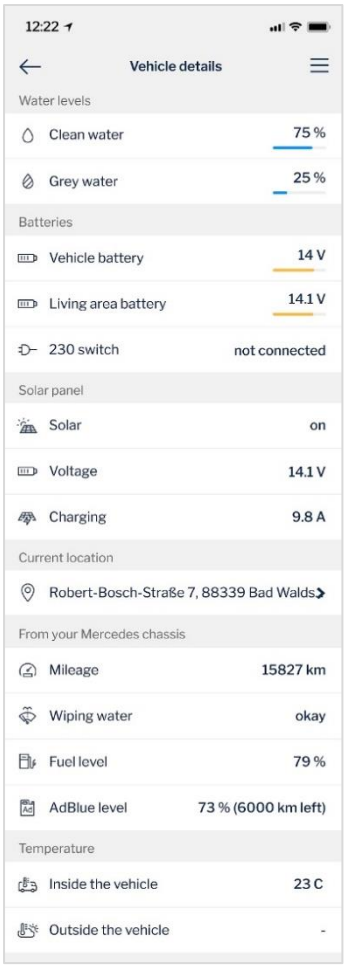
- Brightness and colour temperature of the four-level ambient lighting in the B-ML can be individually controlled using the app
- Smart lighting concept ensures perfect illumination of the interior and improves how the space is perceived as well as your sense of well-being on board
- The exterior lighting conditions during the course of the day can also be taken into consideration (e.g. stimulating interior lighting when the sun is at its peak at midday, soothing, fireside lighting in the evenings)



Intelligent checklists and security features:

- Checklists provide step-by-step instructions for activities that are performed for the first time or only rarely
- App sends the user push notifications with information (including central locking system status, fresh and grey water levels, open refrigerator, extended satellite system if a storm is brewing, open window before departure, low battery level)
- Hymer Service Hotline can be contacted from the app





* All prices are valid for the German market and include the currently valid value added tax (status: 03 / 2021)
